

# Browser restrictions

- It is **impossible** to write a piece of code that reads an arbitrary file in (client-side) Javascript
- ➔ Only files selected by users through file input forms can be processed

```
<form . . . >  
    <input type="file" name="img" multiple>  
    <input type="submit">  
</form>
```

[optional] select  
multiple files

# Sending a file from the terminal

```
$ curl -X POST  
  -H "Content-Type: multipart/form-data"  
  -F "picture=@localpath/to/img.png"  
  -F "username=bart"  
  http://...
```
