

Confidentiality and Integrity

● Threat 1: an attacker **can eavesdrop** messages sent back and forth

**Confidentiality:** how do exchange information secretly?

Threat 2: an attacker **can tamper** messages sent back and forth

**Integrity:** How do we exchange information reliably?

# Confidentiality and Integrity

- Threat 1 : an attacker **can eavesdrop** messages sent back and forth

**Confidentiality:** how do exchange information secretly?

- Threat 2 : an attacker **can tamper** messages sent back and forth

**Integrity:** How do we exchange information reliably?

# Generic solution - HTTPS

✓ HTTPS = HTTP + TLS

➔ Transport Layer Security (TLS previously known as SSL) provides

- **confidentiality:** end-to-end secure channel
- **integrity:** authentication handshake
